Including the complete archives of the Australian Small Animal Veterinarians Conferences

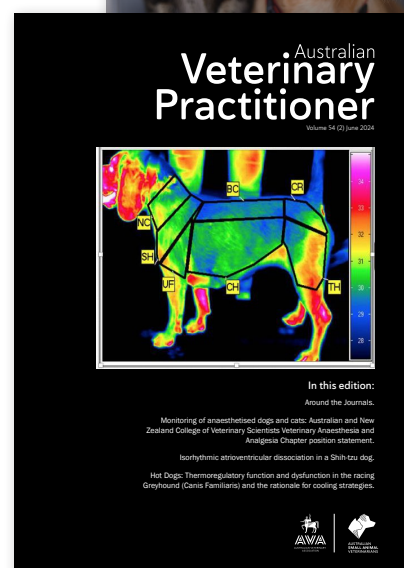

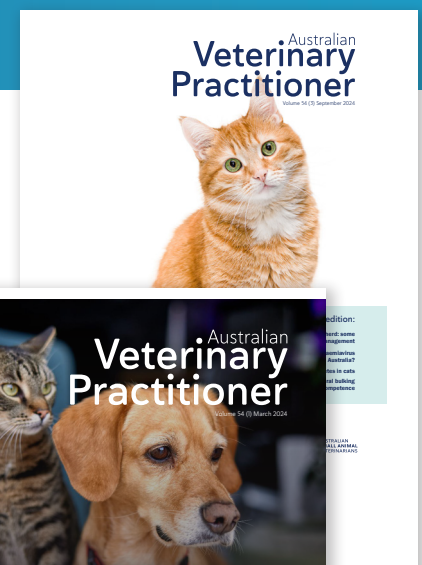

The Australian Veterinary Practitioner (AVP)

was established in 1971 and is a peer-reviewed clinical journal, published four times per year to further the general and educational interests of veterinary practitioners throughout Australia.

The AVP contains clinical reviews, updates and studies. We also promote excellent clinical research papers and essays by veterinary students. The AVP also gives prizes for the best clinical paper and the best case report on an annual basis.

Frequency:

Quarterly – March, June, September and December

SUBSCRIPTION DETAILS

General

All subscriptions provides online access only. Electronic access online is by annual subscription on a calendar-year basis, commencing 1 January. Access to content expires if subscription is not renewed.

Personal subscriptions

For individual subscribers NOT organisations or institutions. All ASAV members automatically receive a copy of each journal. Subscription is NOT available to individuals who are eligible to join AVA and ASAV, who choose not to become a member. For more information about joining the ASAV visit www.ava.com.au/join.

Multi-user, single-site subscriptions

For single organisations located at a single campus or site. For single organisations operating from multiple sites that are geographically separate but centrally administered, provided the total number of people that can access the archive does not exceed 50.

Multi-user, multi-site subscriptions

For single organisations requiring access from multiple sites that are geographically separate but centrally administered, when the total number of people that can access the archive exceeds 50. A subscription is required for each site. Provided a full subscription is purchased for one site, branch sites of the same organisation qualify for a 50% discount on the list price (e.g. a three-site organisation that qualifies under this plan must pay one full subscription and two half-priced subscriptions to gain access for all three sites).
